PROFILE

Multidisciplinary developer and researcher building real-time 3D, digital twin, and augmented-reality experiences. Combines Unreal Engine and Unity development with end-to-end 3D production, scientific visualization, UI/UX, and research communication.

CORE EXPERTISE

DIGITAL TWIN & REAL-TIME

Unreal Engine · Blueprints · C++ ·
MQTT/JSON · Cesium · Mass AI · Google
Colab

3D PRODUCTION

Maya · Substance 3D Painter · RenderMan ·
ZBrush · Blender · Houdini · Photogrammetry

INTERACTIVE & DEVELOPMENT

Unity · C# · AR/Vuforia · Python · HTML/CSS ·
Arduino · UI/UX prototyping

EXPERIENCE

AI for Sustainable Livestock Systems Lab, Texas A&M University · College Station, TX

Graduate Research Assistant | Jan 2025–Present

- Develop a real-time cattle digital twin in Unreal Engine, connecting agent-based methane simulations from Google Colab through MQTT/JSON for synchronized, low-latency visualization.
- Design interactive 3D environments and benchmark system performance to validate methane predictions and support scientific interpretation and stakeholder decision-making.
- Co-lead five undergraduate researchers and contribute digital-twin methodology, software, visualization, writing, and project coordination to a multidisciplinary manuscript.
- Contribute to an AI-in-animal-science book chapter and design/code the lab website and UI/UX.

ENDEAVR Institute, Texas A&M University · College Station, TX

Digital Design Intern | Jun–Jul 2025

- Created UX/UI wireframes and brand guidance for a three-mode automotive interface spanning self-driving, AI-training, and AI-driving workflows.
- Built an Unreal Engine digital twin prototype with Cesium/Google Earth data and crowd simulation using custom paths and Mass AI.

Visualization Department, Texas A&M University · College Station, TX

Graduate Teaching Assistant | Aug 2023–Dec 2025

- Supported courses with up to 150 students and evaluated 70–90 assignments weekly across design, art history, and visualization studios.
- Delivered instruction and technical support in Unreal Engine, photogrammetry, 3D design, and visual studies; collaborated with faculty on course materials.

EDUCATION

Texas A&M University

M.S. Visualization · Dec 2025
GPR 3.86 · Distinguished Student Award

Arena Multimedia

Advanced Diploma, Multimedia Communications ·
Apr 2023
Distinction

Foreign Trade University

B.A. International Economics · Apr 2023
Distinction

ADDITIONAL EXPERIENCE

Vietnam VR Tech Company · Viet Nam
3D Artist Intern | Jun–Aug 2024

- Produced game-ready 3D assets from reference and real-life imagery, covering modeling, UVs, texturing, rigging, skin weighting, and animation.
- Partnered with developers during game testing and localized technical materials for marketplace audiences and partners including Huawei.

SELECTED RESEARCH & TECHNICAL PROJECTS

BovineTwin: An Individual-Level 3D Digital Twin Framework for Methane–Energy Partitioning in Beef Cattle · Shared first author · Under review, Computers and Electronics in Agriculture

Contributed conceptualization, methodology, Unreal Engine software, data integration, visualization, validation, investigation, writing, supervision, and project administration. Presented across Viz-a-GoGo 2025, the Texas Digital Twin Symposium, the 8th EAAP International Symposium on Energy and Protein Metabolism and Nutrition, Texas A&M Student Research Week, and the Diversity in Science Symposium.

From Tradition to Technology: Preserving the Guangdong Lion Dance Through 3D Visualization and Augmented Reality · Master's capstone · Texas A&M Visualization Fall Research Symposium

Built the end-to-end research prototype across cultural research, modeling, UVs, texturing, grooming, lighting/rendering, AI-assisted character development, and Unity-based AR programming. The project contributed to the Distinguished Student Award for M.S. Visualization.

Augmented Reality Coursework · Unity · C# · Vuforia · Photogrammetry

Programmed three interactive 3D AR experiences in Unity; incorporated scanned photogrammetry assets and designed interactions for mobile viewing.

iCare Healthcare Platform · Project Lead · UI/UX Designer · Web Developer

Led UX/UI, brand guideline development, prototyping, and front-end implementation for a healthcare service concept; deployed the coded experience as a portfolio case study.

LEADERSHIP

Visualization Industry Fair Association
Co-director · Aug 2024–Aug 2025

Led four team leads and 20 members; increased recruitment 50% and event participation 33% through resource allocation, partner insight, and brand strategy.

Visualization Graduate Student Association
Vice President · Aug 2024–Aug 2025

Supported strategic planning, organizational management, and execution of association goals; previously served as Secretary.

Human Resources Association, Foreign Trade University
Studio Lead · Apr 2020–Jan 2021

Led media production for five career webinars, reaching 175,000 people in two weeks, and directed video content presented to 5,000+ attendees.

HONORS & AWARDS

- Distinguished Student Award for Master of Science in Visualization · Texas A&M University · Dec 2025
- Guest Speaker · TED Talks in Vietnam · Apr 2023
- Composer · Two YouTube songs with 60M and 45M views · 2018
- Runner-up · Youth Piano Competition in Vietnam · 2013 & 2015; First Place · National Digital Piano Festival · 2012
